It doesn't matter if you're a rookie cop who just graduated the academy or a seasoned SWAT operator, we all have to be as fast and accurate as possible with our duty weapons. This course is designed for the law enforcement officer to elevate their performance with both their duty pistol and patrol rifle. This course will heavily focus on shooting in a way that is more comparable to real life engagements.

On day one, we will be building a solid foundation based on principles of performance shooting with our pistols. We will be solidifying our grip, sight management and trigger control. Additionally, we will also be covering shooting on the move, reloads, aiming schemes & target transitions.

On day two, we will continue to build on our foundation and move over to our patrol rifle. The same principles we learned on day one, will then be applied to their rifles. Utilizing these same principles, students will enhance their shooting capabilities with their patrol rifle. Topics covered are: Rifle mount/connection, trigger control, reloads, aiming schemes, target transitions and shooting on the move.
