

Avata tactical operators course

This course was created to equip public safety personnel with essential skills for effective drone operation in tactical scenarios and critical incidents using the DJI Avata. The comprehensive curriculum enables pilots to grow from a basic to an advanced skill level, emphasizing indoor and confined space operations. Participants will become adept at managing the UAV settings and software and gain a deep understanding of the drone's full capabilities.

Tuition: \$695

When: August 15-16, 2024 (0800 - 1700)

Location: 17595 Mount Herrmann Street
Fountain Valley, California 92708

Contact: Training@TheRTC.org

Students learn insights, tips, and tricks for operating in GPS-denied environments and will use multiple control methods, including the DJI FPV handheld remote controller, DJI RC Motion Controller, FPV goggles, and remote screens to fly in lit and no-light environments.
