ATAK FOR UAS OPERATIONS

The ATAK for UAS Operations Course was designed to enable public safety with the knowledge and ability to use the Android Team Awareness Kit (ATAK) effectively. This two-day course leads attendees through a progression of understanding and application. The course is essential for professionals seeking to leverage ATAK's capabilities for critical missions to be well-equipped to handle complex ground and aerial data coordination scenarios.

This course is explicitly structured to engage learners of varying expertise, from beginners to seasoned users. The first day serves as an intensive ATAK orientation, laying the groundwork for integrating UAS into your ATAK skill set. This approach ensures all participants, regardless of their starting point, gain the proficiency needed to apply ATAK confidently in their UAS operations.

Tuition: $695

When: May 23-24, 2024 (0800 - 1700)
