Metaverse, Blockchain, and Web 3.0 Challenges for Law Enforcement

Provided by: Northeast Counterdrug Training Center

Criminals have started to conduct various crimes in the Metaverse. The metaverse? What is the metaverse? How do you access it? Blockchain technology and Web 3.0 allow for the existence of the Metaverse and there are various technologies used to enhance the Metaverse experience. In-depth information will be presented on types of extended reality, haptics, and best web 3.0 browsers to use for metaverse investigations.

Due to the decentralized structure of the Metaverse, criminals feel more secure operating in this space. Live demonstrations will be provided to illustrate how criminals access the Metaverse and carry out their illicit activities. Although these crimes are occurring virtually, a digital footprint of evidence can still be left behind. Identifying and collecting the digital evidence is critical to successfully apprehending criminals operating in the metaverse space.

WHEN	WHERE	COST
