

UAV Indoor Tactical Course

This hands-on course was created to provide public safety personnel with the knowledge and skills to operate UAVs and ground robots in direct support of tactical and technical operations indoors and in confined spaces. Students will fly precision exercises in reality-based scenarios using multiple aircraft types, infrared, thermal, and self-illumination views. Students leave operationally ready with a deep understanding of UAS applications and capabilities.

Cost/Tuition: \$725

When: December 9 - 10, 2024 (0800 - 1700)

Location: 17595 Mount Herrmann Street
Fountain Valley, CA 92708

Contact: Training@TheRTC.org

Students Will:

- Demonstrate techniques to effectively fly in First Person View
- Understand and apply techniques for interior operations
- Demonstrate advanced operational flight skills
- Apply advanced flight techniques specific to each UAV
- Operate a UAV and ground robot in support of a tactical team
- Identify TTPs
