COURSE DESCRIPTION

This course consists of 8 hours of accredited CE for Law Enforcement. I've listed below a brief outline of the topics that are covered.

- Basic K9 Anatomy and Physiology
- Conducting a systematic and through physical examination of the K9.
- Learning how to obtain and monitor vital parameters.
- Basic and Advanced First Aid for the injured K9.
- Management of Foreign Bodies and Airway Obstruction.
- K9 CPR
- Management of traumatic shock.
- Management of Heat and Cold Emergencies.
- Trauma care for the injured K9 (Bleeding control, penetrating injuries, blunt injuries, eye injuries, fractures, burns, envenomation, and electrocution)
- Management of Medical emergencies (Allergic reactions, respiratory emergencies, cardiac emergencies, poisons, bloat, and seizures)

The course consists of lectures along with various skill stations as it relates to the topics listed above.
