LICENSE PLATE RECOGNITION
TRAINING CLASS

Learn about the diverse uses of License Plate Recognition (LPR) technology and how to utilize the tool in real world scenarios. Led by former law enforcement members, this course will demonstrate how to integrate a cloud based commercial LPR data platform into the existing traditional law enforcement deployment LPR model.

LICENSE PLATE RECOGNITION TECHNOLOGY AND BEST PRACTICES

While you will learn about all currently available LPR systems, this course will mostly focus on the LPR database, Vigilant VehicleManager. You will see firsthand how using billions of plate detections can maximize investigative efforts in almost every facet of the job, including both areas of proactive field enforcement and investigations.

In this course, you will be working through real-world scenarios on the VehicleManager database, utilizing analytical tools with step-by-step instruction. In addition, you will learn how to query fixed and mobile LPR Data to generate case-solving leads.
