K9 Team/Bomb Squad Integration Course
Hosted by the Pasadena Police Department

Is there a capability or operational gap between your ‘bomb detection k9 teams’ and Bomb Squad? For most agencies in North America, the answer is absolutely yes. Do the two disciplines train, work and support each other? If not, the time to resolve these issues is now – not when a critical incident occurs.

This training course is designed to close that existing operational gap and to do so properly, using street-proven tactics. Tactics known to work for both disciplines. When trained up properly, it affords your agency AND YOURSELF with a flexible and enhanced incident response capability.

The course is NOT intended, nor will it, offer short-cuts. The job of counter-IED and explosives detection in the 21st Century is too important.

Using a combination of classroom presentations, tabletop exercises, individual observation and reaction drills, reinforced by scenario training exercises, we will show the critical role of ‘bomb detection dog’ teams and Bomb Squads supporting each other in the performance of the counter-IED mission. One Team – One Fight is our training mantra.

- The Team Mission – What Works and What Doesn’t
- All-Hazards Awareness – IED, Explosives, HazMat, Incendiary
- Assessing Threats and Reducing Risk
- Tactical Questioning – Tactical Decision Making
- Bomb Threat Management – Bringing Expertise to the Chaos and Drama
- Response Procedures and Action Drills
- Vulnerability Assessments
- Search Operations

Course material will be provided. Seating for each class is limited and a certificate will be issued after the completion of the course.
