LACRTC.ORG

This 8-hour course is designed to meet the needs of public safety agencies exploring the possible use of Unmanned Aircraft in law enforcement, Fire/EMS, and first-responder personnel in the following areas:

- Legal and operational requirements of the public agency, including FAA waivers, insurance, and airspace considerations
- Evaluate UAS operations as they pertain to Privacy and Civil Rights issues and the impact on public perception
- Application of laws and regulations governing UAS aircraft
- Examination of types of UAS operations, capabilities and limits including policy, equipment, team structure, and missions
- Evaluate the suitability for UAS operations within the operational environment
- Review of Part 107 operational waivers compared to a Public Certificate of Authorization (COA)
- Identify key resources for UAS operators to maintain currency in a changing field
