

The FAA Remote Pilot Certificate allows public safety personnel to operate Unmanned Aircraft Systems under Part 107. This course will thoroughly prepare you to pass the 60-question exam. No previous aviation knowledge required! Topics covered include:

- ✓ Operating rules/regulations of Part 107
- ✓ Emphasis on how to read and understand airspace classes and charts
- ✓ Aviation weather
- ✓ Aircraft performance
- ✓ Emergency procedures
- ✓ Radio communication procedures
- ✓ Maintenance requirements
- ✓ How to schedule your Remote Pilot Certificate exam at an FAA facility

This 2-day class is taught by instructors who are current public safety UAS operators in the field. If you are just starting a UAS program and need to obtain your Remote Pilot Certificate, or if you are looking for a Part 107 review, this is the class for you! We encourage open discussion, questions, and a comfortable learning environment. Best practices and real mission examples also provided.
